Mission

Bisons International aims to set a new global standard for professional beauty tools, while also increasing awareness about the often overlooked yet powerful professional beauty industry.

We offer top-quality products at great value. Our main services include high-quality tools for professionals, customizable products, and Private Label options.

Our team is quick and flexible in responding to market needs.

Producing the Best European Quality under particularly resource-saving,

Certificate

Bisons International has successfully integrated ISO 9001, an advance quality management system aligned with global standards. A well-structured workflow management system stands as the pivotal element in the production of premium-grade products. In addition, our subsidiary, Bisons International holds Certifications from CE & MDR, attesting to our commitment to deliver instruments of unparalleled quality and reliability.

Manufacturing

Every tool is meticulously crafted, preserving and upholding the tradition of skilled craftsmanship. Bisons International ensures its tools are professionally sharpened by expert's master craftsmen.

Certain intricate procedures demand a level of precision and care that even the most advanced machinery cannot achieve. Given the intricacies involved in manufacturing manicure instruments, we have dedicated highly trained personnel to this endeavor. Bisons International embodies cutting-edge technology merged with unwavering professionalism- a blend that culminates in the creation of lawless tools.

Why Choose Us

At Bisons our core strategy revolves around the philosophy of 'internalizing' the relationship with its customers. This philosophy runs contrary to the typical relationship between a supplier-customer to that of a 'partner' where the factory adopts a deeper understanding of it being an integral stakeholder with its partner. This directly implies that we believe in more transparency, more open and clear communication so that the factory becomes an inclusive member of its customers' supply chain.

If you are a new growing business, we will help you to grow faster with prompt deliveries, cost effective products along with consistent quality because we believe that we grow when our client grows. If you are an established name then we will be the adrenaline punch for your growth.
